WPO Acknowledgment Language for Publications, Datasets, and Code

Purpose

This document provides standardized acknowledgment language for WPO-funded Principal Investigators (PIs) to use in publications, datasets, and code to ensure compliance with NOAA's Public Access to Research Results (PARR) policy. Proper acknowledgment credits WPO funding, enhances transparency, and supports open science by linking outputs to accessible repositories. The examples below are tailored for WPO-funded research and real-world examples are included to demonstrate proper application. Update [Award Number] with your specific WPO award number (e.g., NA20OAR4590367) and [Repository Name/DOI/URL] with the actual repository and persistent identifier.

For further guidance, refer to the NOAA Central Library's [Example Publication Language Document.](#)

Example Standard Acknowledgment Language

Publications (Journal Articles, Reports, etc.)

- This publication was funded by the NOAA Weather Program Office (https://ror.org/01q70bz83) under award NAXXOAR459XXXX
- *Place in the acknowledgments section or as required by the publisher.*

Datasets

- This dataset was funded by the NOAA Weather Program Office (https://ror.org/01q70bz83) under award NAXXOAR459XXXX
- *Include in metadata or accompanying documentation.*

Code

- This code was developed with funding from the NOAA Weather Program Office (https://ror.org/01q70bz83) under award NAXXOAR459XXXX.
- *Add to README files or inline comments.*
